Dear Dr. León

Please I want to submit the manuscript "*Vegetative propagation of native species potentially useful in the restoration of Mexico City's vegetation.*" by Renato Ramos-Palacios, Alma Orozco-Segovia, Maria Esther Sánchez-Coronado and Victor L. Barradas for its possible publication in the **Revista Mexicana de Biodiversidad**. This paper is about work that we believe it is very important for the conservation of the biodiversity of the Mexico valley and especially the biodiversity of the Pedregal de San Angel in combination with other elements in Mexico City, which comprises the propagation of three central plant species.

Thanks a lot for your attention and I hope to hearing from you soon.

Sincerely Yours

Dr. Victor L. Barradas
