Editor-in-Chief
Revista Mexicana de Biodiversidad

Dear Dr. Fernando Álvarez Noguera

Please find attached our manuscript entitled “**First record of Trematoda in *Salvator merianae* (Duméril and Bibron, 1839) (Squamata: Teiidae)**” for a possible publication in the journal. The Research note records the first occurrence of Digenea in *Salvator merianae* in Brazil. Records of *Brachylaima* Dujardin, 1843 (Trematoda: Brachylaimidae) in lizards were realized only in Europe and Eurasia, therefore this article present results inedit for the South American continent. The manuscript elaboration followed the guidelines of the Revista Mexicana de Biodiversidad and it was revised by a professional English speaker.
