Dr. Fernando Álvarez Nogueira

Editor- in-Chief of Revista Mexicana de Biodiversidad

We are sending by electronic submission the original paper research “**On two species of the genus *Ichthyouris* (Nematoda: Pharyngodonidae) in *Mesonauta festivus* (Pisces: Cichlidae) in the Brazilian Amazon region**” for publication in **Revista Mexicana de Biodiversidad**. Each author has read the manuscript and accepts responsibility for its contents and has no conflicts of interest concerning the work reported in this paper.

We suggest as potential reviewers Dr Mauricio Laterça Martins (UFSC, Brazil) (mauricio.martins@ufscar.br) and Dr Marcelo Knoff (Fiocruz, Brazil) (knoffm@ioc.fiocruz.br). Both of them have experience with helminths taxonomy, including the Filo Nematoda. Dr Mauricio L. Martins described a new species of the genus *Ichthyouris*.

Thank you for your attention,

Melissa Querido Cárdenas
