

Supplementary Figure 1. M area created following Barve et al. (2011), for model calibration (sensu Soberón & Peterson, 2005) that reflects the historically accessible areas and restriction regions for the Yellow-green vireo (*Vireo flavoviridis*). Red dots depict breeding data points and blue dots depict non-breeding data points as obtained from GBIF (<https://doi.org/10.15468/dl.rcqler>; 24 July 2019).
